

Xebia Academy Global ties up with DevOps Institute

March 13, 2020

Editorial Team

Xebia Academy Global, education Business Unit of Xebia has entered into a strategic partnership with DevOps Institute to bolster the adoption of DevOps across the globe for digital learning and upskilling of the workforce.

The collaboration will make available the most relevant learning materials and well recognized certifications in the market to support individual aspirations and client needs. Keeping up with the shifting market demand, the collaboration will foster students, individuals as well as corporate groups to upskill and train themselves in emerging DevOps practices, training, and certification. The DevOps learning courses and certifications will help IT professionals to expand their horizon, speed up the software release cycle and enhance autonomy within teams. Students can leverage these courses to acquire skills that bridge the disconnect with the job market.

Talking about the tie-up, Brijesh Kohli, Director of Xebia Academy Global said, "We constantly strive to bring in courses that are relevant and futuristic. The present tie-up with DevOps Institute is one such effort, where we want our students and corporate workforce to be future ready and reinvent themselves. The synergy will help and equip them to adopt the latest advancements in the technology with the support of people who are the best in disseminating this knowledge".

Throwing light on the partnership & role of DevOps Institute and its mission, Dheeraj Nayal, Global Community Ambassador, DevOps Institute Inc., said, "DevOps Institute's Education partners support the Skills, Knowledge, Ideas, and Learning (SKIL) Framework for advancing the 'Humans of DevOps' and millions of IT professionals around the world. DevOps Institute's new Global Education Partner – Xebia Academy Global will optimize the accredited courses and programs that teach students & professionals about the most up-to-date patterns and practices for enterprise IT, DevOps, Agile, Security, Testing, Continuous Delivery and Site Reliability Engineering (SRE). Each course and program prepares IT professionals to pass DevOps Institute's corresponding certification exams which help in career advancement and support emerging practices within the DevOps community.
